

**Cat. No.010/TV**

Indexing Thumb Wheel Turret

Stripping Profile

## SMARTSTRIP TV

Produces 3 step cuts to two different coaxial cables. No setting required, simply insert wire to the selected stop, index the thumb wheel to the required cut, rotate the tool around the wire and remove the slug. There are two dedicated tools available from stock, other dedications available to order.

- A simple thumb wheel indexes the cutter profile allowing the tool to produce 3 step cuts to two types of coaxial cable.
- To operate index the turret to the required cable type and set at position 1, squeeze the trigger, insert the cable and rotate the tool around the cable axis. Repeat the process for cuts 2 and 3.
- No blade setting required

### Technical Specifications:

#### Stripping Capacity
