

Simple Wire Strippers

010/UNI Smart Strip

This versatile pocket-sized tool will strip all types of standard insulation producing a controlled depth of cut to all sizes of wire and cables up to 10mm dia. Simple and accurate, the tool is equipped with a fine depth of cut adjustment and blade cushioning to allow stripping of delicate shielded multi-core cables with an irregular periphery. Simply insert the wire or cable - rotate the tool against the spring pressure and remove the stripped slug.

- Ideal for round wires and cables as well as UTP and STP data com cables and irregular sheilded multi-core cables.
- Depth adjustment mechanism/spring loaded action.
- To operate simply squeeze the trigger, insert the wire or cable and rotate the tool around the wire or cable axis.
- Remove the neatly cut insulation.
