

Cat. No. 046**MK1FD**

The very first self adjusting wire stripper introduced on the market way back in 1967. The MK1FD is compact with a powerful 'one-hand' action. To allow the tool to withstand the rough treatment of field use, the main body components are of die cast aluminum with linkages of pressed steel thereby giving a long lasting performance and constant precision.

The stripping jaw is fitted with an adjustable length stop which can be easily removed if required.

- Durable Aluminum Frame
- Power Full One Hand Operation
- Damage Free Stripping

Technical Specifications

Capacity:
Stripping: 0.08 to 2.5mm²
Dimensions: 165 x 64 x 16mm
Weight: 240gms
