

Simple Wire Strippers

05021 Stripping Pincher

Die Blade Profile

Stripping profile

Precision made from carbon steel, these spring loaded stripping pinchers are equipped with a cutter and precision ground multi-aperture die type stripping blades with wire sizes clearly marked. The ends are also finely serrated to give a better grip for looping and pulling. The tool is finished in black oxide for corrosion resistance with sure-grip handles and a handle lock for safe and compact storage.

- Precision ground cutting and stripping edges hardened and tempered for clean and precise stripping and cutting.
- Conveniently located wire looping and bending holes.
- Serrated nose for gripping and pulling.
- Equipped with spring loaded handles for ease of use.
