

Cat. No. 062

ROTA STRIP

The Rota Strip has been designed as an economical tool for stripping PVC and rubber insulations on round. The Rota Strip features a spring loaded cable retention arm with an integral chisel edge to aid in the removal of tough insulations. The depth of cut is adjustable up to 3.0mm and the replaceable cutting blade can be rotated through 90° by a simple press of the side button. This enables the tool to first complete a circumferential cut around the diameter of the cable and then a longitudinal cut along the length of the cable.

Mid-span cable stripping can also be achieved using this method. The tool is supplied with a spare blade housed in the body of the tool.

- Safe Easy to Use
- End & Mid-Span Stripping

Technical Specifications

Capacity:	
Stripping:	4.5 to 26mm Ø
Depth of Cut:	3mm max.
Dimensions:	125 x 40 x 15mm
Weight:	69gms
