

Cat. No. 063

MK02

A hand cable stripper for the fast and effective removal of outer insulations from round cables between 4.5 and 28.5mm diameter. The MK02 consists of a spring-loaded gripping arm, and an adjustable cutting blade which can penetrate up to a depth of 3mm. A simple grip and rotate action will cut cleanly around the circumference of the cable. The blade may then be turned through 90° by depressing the side button. This allows the tool to cut along the length of the cable, enabling the insulation to be peeled away easily.

The MK02 is also equipped with a spring-loaded ripping blade situated at the base of the tool to facilitate insulation removal.

- **Circumferential & Longitudinal Stripping.**
 - **Precise Clean Cuts.**
- **Equipped with Ripping Blade.**

Technical Specifications

Capacity:	
Stripping:	4.5 to 28.5 dia.
Depth of Cut:	3mm
Dimensions:	135 x 40 x 15mm
Weight:	120gms
