

**Cat No. 076****Wire Guide  
& Blade****Ripping Blade**

## SLITALL

Splits any length of outer insulation from round or flat cable. The cable is held and guided throughout the slitting operation. The tool is also equipped with an adjustable cutting blade depth of up to 5mm and a retractable ripping blade to aid insulation removal. Simply adjust guide to suit cable width and set cutting depth. Push back the cable guide, insert the cable and split the required length of insulation.
