MK6

Manually operated it strips round and flat multi core cables. Fitted with two sets of blades. A single pull of the lever the machine strips the outer sheathings and inner conductor's simultaneously. As a standard the machine is equipped with a set of die blades for round cable making a clean and precise cut (die blades for flat cables available on request). Both sets of blades are adjustable.

The stripping length of the outer sheathing and the inner conductor are independently adjustable. Once set, the length can be repeated with precision. No special skills required for setting or operating machine.

Suitable for mass production stripping the MK6 is fitted with one set of die blades, (for the removal of the outer sheathing of round or flat multi core cable) and a pair of stripping blades for stripping the inner cores.

With a single pull of the lever the machine strips both the outer sheathings and inner conductor's simultaneously.

As a standard the machine is supplied with a set of die blades for round cable making a clean and precise cut (die blades for flat cables available on request). Both sets of blades are independently adjustable.

The stripping length of the outer sheathing and the inner conductor are independently adjustable. Once set, the length can be repeated with precision.

No special skills required for setting or operating machine.
Complete operating instructions are supplied with the machine.
