

In this issue...

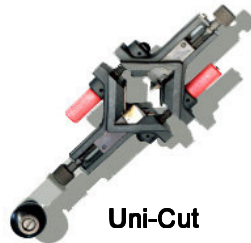

- *The First Self-Adjusting Wire Stripper*
- *Double Cut / Uni-Cut From Our Range of Cable Preparation Tools*
- *Oct / Nov Exhibition at Dubai*

The first self adjusting wire stripper which was invented and designed by ZB Tools and manufactured by Abeco Ltd. This was the MK1FD way back in 1967. The unique design was world patented and at the time has revolutionized the world of wire stripping.

The introduction of the self-adjusting mechanism allowed the user to strip a range of different wires without the need for adjustment.

MK1FD

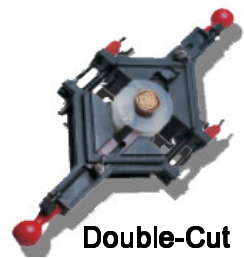

Uni-Cut

ZB Tools has a very specialized range of **Cable Preparation Tools**. This range is specially designed for professional stripping of low/medium/high voltage cables up to 110mm cable diameter.

These include our unique Uni-Cut and Double-Cut which are :

- self feeding
- easy to use
- made from high quality materials
- lightweight
- compact, thus making them highly suitable to be used in confined spaces.

The tools, are clamped over the cable, self feeding and can be effortlessly operated with precise results. Furthermore these tools perform three functions: **Cutting** up to 18mm thick XLPE insulation, **Shaving** semi-conductive screens and **Scoring** to remove peel-able semi-conductive screen; no special skill is required to set the tools and change from one operation to another.

Double-Cut

The largest annual meeting place for the Middle East construction and contracting industry
28 October to 1 November 2006
Dubai International Exhibition Centre

Our next exhibition will be held in Dubai—**The Big 5 Show**. We will take the opportunity to meet with you should you be attending this event

Kindly let us now in advance should you be able to visit our stand so that we could include a confirmed meeting time in our schedules. You will find us in **Hall 3 Aisle F No.112**.
