

In this issue...

- **CD Catalogue**
- **Tool Personality**
- **Where to use our tools ...**
- **News from the Wire Industry**
- **Electrical joke**

Dear reader,

We would like to inform our esteemed clients that we now have the new updated product catalogue on CD, available on request; please send us an email with "CD Catalogue Request" in the subject line to sue.gambin@zbttools.co.uk

Tool personality for this issue is ...

Our **CS-40** the **Indispensable**; a must in the tool box of every electrical power engineer because it's:-

- Safe
- Accurate with minimum effort
- Suitable for mid span & end stripping
- Self adjusting to all cable sizes between 6.0mm - 40.0mm diameter

ZB Tools has a number of tools to assist installation technicians in various projects such as:-

- **Industrial Networking:-** Where large diameter cables are installed during industrial constructions, ZB Tools offers a wide range of specialized cable preparation tools.

- **Computer Network Systems:-** ZB Tools crimping program consists of a wide range of tools and dies. Our crimpers are available in three different materials: steel, aluminium and stainless steel.

- **Security systems:-** ZB Tools has a number of automatic wire stripping tools that range from 0.08 - 25.0 mm

A forecast for the UK wire and wire products has predicted that there is going to be a rise in the UK's consumption of wire and wire products throughout 2007 to 2011. This is due to demand from key end-use industries such as construction growth. It is expected that by the year 2011 there will be a growth of 14% compared with 2006.

Q: What is the definition of a shock absorber?

A: A careless electrician!
