A selection of top quality De-soldering suction pumps provided with safety shield and solder repelling ejector and replaceable PTFE or silicon rubber nozzles.

Comprising the unique multi suction Multi - Vac, the Flexi - Vac with the flexible nozzle tip and the Val-U-Vac with the plastic body. All models are available in standard or anti-static version.

Zdzislaw Bieganski registered **AB Engineering** Company in England in 1957 and started the activity as sub contractor to local car industry. By 1967 his first international patented was registered and the world's first self adjusting wire stripper, the MK1FD entered the international markets with resounding success.

The company was rapidly growing and early in the 1970 expanded it's operation to Malta (EU) and **Abeco Ltd** was set up to manufacture and assemble the MK1FD and all subsequent new products.

Earlier this month Mr. Bieganski together with his lovely wife, management and staff at Abeco celebrated the beginning of the 40th. year of their manufacturing operation in Malta.

With constant development and upgrading of new and current products, a skilful team and effective leadership we are optimistic of the future even in the present international economic environment.

Our participation at the MEE09 in Dubai earlier this February was a very successful event thanks to all visitors.

It was another opportunity and a real pleasure to meet with some of our clients and making new contacts.

Our offices will be closed from the 8th to 23rd August 2009 for the Summer holidays.

Please make sure that any urgent orders reach us by 3rd August for delivery before shut down to avoid disappointment.

We take the opportunity to thank you for all your continuous support.

Pretty Bay, Bugia - Malta

After Receiving An Invitation To An Inventors' Ball:

Edison thought it would be an illuminating experience.

Watt reckoned it would be a good way to let off steam.

Stephenson thought the whole idea was loco.

Wilbur Wright accepted, provided he and Orville could get a flight.

Morse's reply: "I'll be there on the dot. Can't stop now must dash."
